Dam's Name: _____ SHR #: _____

Foals conceived in 2004 or later must have both parents registered in the SHR and have had a breeding report submitted to be eligible for registration as a full-blooded Sulphur horse. If the mare is not registered, the foal will be registered in the appendix registry. The fact that the parents are registered in another registry will not substitute for SHR registration, however hardship cases will be considered for SHR members in good standing that acquire an ineligible foal.

If the unregistered parent is a BLM freezebranded mare from the Sulphur Springs HMA, the foal can be registered if a stud report had been submitted in a timely manner that had a copy of the mare's BLM title attached to it. If no stud report was submitted, the parents and foal must undergo parentage DNA testing before it will be registered. A stud report is not required to register a foal out of a registered mare and by an unregistered stallion, but the foal will be registered in the appendix registry unless the stallion is a BLM freeze branded horse from the Sulphur Springs HMA. Since stud reports cannot be submitted for unregistered stallions, DNA testing will be required to prove parentage of the foal.

Foals conceived in the wild that are not BLM freeze branded must be registered before six months of age. If the mare is not registered, a copy of her title must be submitted with the registration form.
